Bidding opens December 3rd and closes December 5th. Don't miss this opportunity to invest in top-quality bred heifers!

THE CORNERGLEN DIFFERENCE

At Cornerglen Ranching, consistency isn't just a goal, it's the foundation of everything we do. Our bred heifers are among the most uniform, sound, and even-tempered groups you'll find anywhere. Most are half-sisters, raised under the same management and developed with one purpose: to become efficient, long-lasting, maternal females that thrive in real-world ranch conditions.

The bulls we use on our heifers play a major role in that consistency. Many of them come straight out of our own breeding program, home-grown, proven sires built by the same cow families that anchor our herd. Most are half-brothers, selected for calving ease, structural integrity, and quiet dispositions. That kind of genetic alignment pays dividends... in the calving pen, in the pasture, and in the replacement pen when daughters rise to the top.

Our health and management standards are equally rigorous. Every animal is part of an industry-leading herd health program and handled daily, ensuring docility and ease of management. We maintain a short, targeted breeding window to produce a uniform, marketable calf crop. Every feed ingredient is tested before use, guaranteeing optimal nutrition through every stage of development.

At Cornerglen, we don't cut corners. We've built our reputation by doing things right; the same way, every time. Every heifer leaving our ranch is backed by generations of careful breeding, precise management, and a commitment to integrity that runs deep. We've been here a long time, and we're here to stay.

When you buy from Cornerglen Ranching, you're not just purchasing cattle, you're investing in decades of experience, thoughtful selection, and a steadfast promise of quality. Our bred heifers are developed to elevate your herd's performance, longevity, and profitability.

Join us at our Open House on November 15th, and mark your calendar for our Bred Heifer Sale on December 5th, 2025.

Discover firsthand what makes the Cornerglen difference; where consistency, integrity, and practicality come together to build better cow herds.
