The Transcon Team Welcomes You!

We're thrilled to host this year's event at the Skywest Simmentals sale facility, located just southwest of Didsbury. With a refreshed look and a brand-new location, this promises to be one of the most exciting Simmental sales of the year.

On behalf of the consignors and everyone at Transcon, we extend our sincere thanks to the Daines family for being such exceptional hosts since the very first Western Harvest Sale back in 2014.

For over a decade, Western Harvest has built a strong reputation as one of the "go-to" sales of the year for sourcing top-quality Simmental genetics. That legacy continues in 2025 with an outstanding offering from a group of highly respected and reputable consignors.

It's truly a pleasure to work alongside such dedicated Simmental enthusiasts who share a commitment to producing productive, profitable females with built-in longevity. With 67 live and frozen lots on offer, there is truly something for everyone—each backed by generations of proven cow families and sired by some of the most exciting and progressive sires in the industry.

The guesswork has been taken out of the equation—what you see is the finished product, ready for your appraisal. We encourage you to take the time to study this impressive offering. Whether you're looking to strengthen your foundation or take the next step forward in your program, you'll find the genetics to do so right here.

We look forward to welcoming you on November 15th at the brand-new Skywest sale facility near Didsbury. Come early and enjoy a steak dinner courtesy of Kodiak BBQ, and stay late to take in some great hospitality!

If you're unable to attend in person, don't hesitate to reach out to any one of us at Transcon, we'd be happy to discuss the cattle on offer and assist you in finding your next great female.

See You Sale Day!

Transcon

Welcome from Skywest Simmentals

On behalf of all of us here at Skywest Simmentals, we would like to welcome you to the 12th Annual Western Harvest Sale. We hope that you all had a successful harvest after enjoying a summer where most areas seen more rain than in previous years which helped the crops for many farming operations. It was a busier than normal summer around our farm and after many discussions as a family and with our fellow consignors we made the decision it was time build a sale barn here at the farm and continue the legacy of the Western Harvest sale. We do want to thank the Daines Family and the Innisfail Auction Mart for being a great host for the sale over the years.

We also want to thank our fellow consignors in joining us with the venue change. The Western Harvest has been a huge success over the years not just because of the great cattle that sell in it every fall but the great people behind those cattle and we look forward to continued success for all consignors for many years to come.

As most are aware that its been over 2 years now since the Skywest herd join forces with the incredible cow herd of Virginia Ranch which has built the foundation for Skywest Simmentals of today and the years to come. We are forever grateful that Harry, Michelle and the entire Satchwell Family entrusted us with their life's work of creating one of the most influential Fleckvieh herds in all of North America.

This group of heifers is our largest in number and most powerful group of females that we have ever made available by auction. The breeding power of Milsap, Rumble, Synergy, Driller, Rambler, Voltage, Marquee, Dutton, Kryptonite, Landmark and Radko proved successful as you will see progeny from each bull throughout the sale string of heifers. The goal is to produce females that will be productive in their new herds while maintaining strong udders, proper bone structure for longevity as breeding stock and great disposition.

We would also like to thank the Transcon Livestock team for the professional services that they provide us throughout the year.

All heifers will have videos available to view a couple weeks before the sale day. If you have any questions or would like to tour the heifers prior to sale time feel free to give any one of us a call.

Sincerely,

The Edwards Family

Since the day that Virginia Ranch acquired "Milsap" in the spring of 2022 for \$110,000 from the Best of Both Worlds Bull sale hosted by Double Bar D Farms, he has been on the radar of all Fleckvieh breeders that have seen him or heard about him. When the opportunity to acquire the majority of the Virginia Ranch herd presented itself, we knew that "Milsap" needed to come join the Skywest bull battery.

We knew "Milsap" was special, but after watching him breed 40 cows last spring and admiring how easily he moves across the pasture, his incredible depth of rib, thickness and big black feet, he exceeded every expectation we had for him. He has been impressive at every stage of his life and we were proud to showcase him at The World Simmental Conference held at Clearwater Simmentals. The entire industry was able to experience him up close and appreciate everything that makes him great.

This is only the second opportunity to acquire Milsap semen as last year we sold 15 straws that averaged \$3,833/straw in the National Trust Sale. Don't miss out on this incredible breeding masterpiece.

With his second group of bred heifers hitting the sale market this fall, they are simply impressive. The Milsap bull calves are incredible this year that make up the largest sire group in our bullpen, which will be on display at the Virginia Ranch/Skywest bull sale in February 2026. They are worth a farm visit to see in person or take a tour when you arrive for the Western Harvest sale 2025. His calves are stamped with his dark pigmentation, heavy hair coat with a moderate birth weight and tons of growth in them at an early age.

Offering Choice

We have spent all summer trying to figure out how to keep these two incredible heifers in the herd or make them available in the Western Harvest sale that's known for top tiered genetics.

What we finally came up with is.... The bidders can make the choice for us as highest bidder can pick their favorite and we will happily put the other heifer back in the herd.

- Virginia Destiny 804F is an incredible BEE Ducati 191D sired cow with a perfect udder and excellent feet. She is the dam of Destony 468M and grand dam of Maple 472M. Beechinor Bros Simmentals purchased her first heifer ever sold in 2021 at the Western Harvest Sale for \$31,500.
- Virginia Jordyn 174J is sired by Radko 751G who is indeed a Gudas son that Harry retained for his own use. Jordyn is the dam of Maple 472M and what a job she did. And it was no fluke as Jordyn has an incredible Milsap heifer at side this summer again.
- These two heifers are polled and sired by either Milsap or Voltage. You cant go wrong with either one
- Both heifers are Diluter free

- Another polled "Voltage" heifer that speaks for herself. I don't want to keep telling everyone how good they are. Take a look and see for yourself
- We struggled putting these "Voltage" heifers in the sale pen, as they should all be staying. That being said we do look forward to them creating their own future and hopefully we can bring back some of their genetics into our herd down the road.
- "Holley's" dam also produced the "Virginia Rush" calving ease bull that Harry retained to use on his own heifers. So that speaks for itself how good he is.
- Diluter Free

Bred April 7, 2025 to Wolfe Landmark FF 428L. Exposed March 20 - May 16, 2025

- Power and volume is a very accurate description of this polled heifer
- Heavily pigmented, doubled goggled lots of rib and hip
- These Voltage females are front pasture heifers that are some of the first ones noticed when touring the group
- Moana's mother is a fancy made crude daughter who we like quite a lot. Mostly because the crude progeny have worked very well for us over the years.
- Dilutor Free

- Look at this naturally thick and excellent footed female
- Another strong "Voltage" daughter that we think very highly of and these voltage progeny are consistent year after year.
- "Brandy's" dam was one of Harry's picks out of the strong set of heifers that sold in the Southern Alberta Round-Up sale.
- Some older names show up in these bloodlines (LFS Balboa 40U, Anchor T Impact 2H, Sibelle Vicking 35B)
- Dilutor Free

Bred March 27,2025 to Wolfe Landmark FF 428L. Exposed March 20 - May 16, 2025

- Holly is one fancy heifer with her full goggles, lipstick marking and dark red pigment
- She is the direct result of being sired by Voltage and her easy doing dam Starwest Pol Hailey. Who is a direct daughter of the \$275,000 BLL Kalibre bull that made waves the year he crossed the sale ring.
- This polled heifer has all the tools
- Dilutor Free
- Homo polled

- This dark red powerful heifer is one that we like a lot for her quiet disposition and big-barreled middle.
- Virginia Ranch purchased her dam for \$16,500 at the 2018 Western Harvest Sale from Spruce View Acres. She is still a great looking cow even with a few years on her as she continues to produce.
- We are confident that Valery will follow closely in her mother's footsteps and be a cornerstone in someone's program.

- Endless potential with this heifer, these "Milsap" heifers are flat out good
- Her dam Virginia Madilyn 802F is a "Marquee" daughter that is one hell of a cow. She's had 6 calves that have all made the sale ring and reside in Alberta, Manitoba and Iowa. She did it with "Maddy" and did it once again this year by putting one of the top bull calves in our bull pen this year. And Yes he's a "Milsap" as well and a special one to watch for next February.
- Don't miss out on the opportunity to acquire these highly productive genetics.

- To say that we love our Milsap heifers like Melany is an understatement and we really have a tough time letting any of them go.
- Melany's incredible depth and volume made her a popular choice during the summer pasture tour season.
- The only reason that we agreed to sell her is that the sale is a special one for us as it's the first female sale hosted at our farm. So we knew we needed some show stoppers to make it a memorable one. Melany does just that.
- Her mother BLL Ember 1827F is an excellent cow that Virginia Ranch purchased from Beechiner Land & Cattle. A cow that will most likely be a donor cow for us in the near future
- Melany clearly has endless potential and will make a tremendous donor one day. Don't miss out here

- Eva is another big hipped, long spined Marquee daughter that we have enjoyed watching cross through the sale ring the last few years.
- Marquee could possibly be one of the biggest secrets in the Fleckvieh breed that didn't get the attention that he deserved (mostly due to the powerhouse bull battery that Virginia Ranch had put together). His progeny has the frame, the udder development, great footed and when his females begin to join the calving herd. They quickly climb to the top for all the reasons that makes Fleckvieh cattle so great
- Eva is the real deal and so take a serious look her way

Bred March 21, 2025 to Crossroad Titan 14L. Exposed March 20 - May 16, 2025

- "Vivian" is part of the first wave of NUG Rambler daughters to hit the sale market and we are quite impressed with barreled middle sections and big hipped
- We think they could develop into some powerful and easy doing breeding stock
- Ever since the day we seen "Rambler" for the first time at the Maxwell Bull sale and somehow was lucky enough to purchase him as the lead off fullblood bull, we have been eagerly waiting to see his progeny develop and they have not disappointed.

- Another polled "Driller" daughter that should have some friends on sale day. Ask any of us here at Skywest about what we think of "Driller" and his daughters and the constant comment is that we wish we had more of them in the herd
- His progeny are long spined, nice tidy skulls and excellent footed.
- When you add a splash of "synergy" on the dam side you have the best of both worlds. I don't think we need to mention what "Synergy" genetics have done over the last few years other than record prices year after year!

- This is a heifer that we have a bit of a soft spot for, as she is the last "War Cry" heifer to be born on our farm as he now works for a new herd in the Red Deer area.
- She carries all the traits that War Cry displayed in his progeny, excellent disposition, pasture pet, big barrel and heavy boned which is rare to find from a calving ease bull.
- If you are looking for a heifer that will meet you at the gate and follow you around the pen than "Kenzie" would fit the bill, a plus is that she's also a pretty darn good heifer.

Welcome from Beechinor Bros. Simmentals

Michelle, Kyler, Austin, Easton, Kaidynce and I would like to welcome you to the 12th Annual Western Harvest Heifer Sale. A year ago, I thought how could this thing get any better, we were seeing record prices, and the cow calf pair sector was making a profit! A year later the record prices never stopped being set, so I guess I will say it again "what a time to be in the beef industry!". Heck it's still fun taking the cull cow to town!

Kyler had a big year, in June he graduated from High School and in September moved to Vermillion to start his schooling at Lakeland College. Who knew he was such a great help!!!! We miss him but are excited for him all at the same time!

Easton and Austin have made the same hockey team and Easton has gotten his driver's license! I feel for Michelle, as now she doesn't have to be driving to all those hockey practices, I know I can add things to the honey to do list! Kaidynce still has a weird passion for horses and we aren't 100% sure where this problem came from. That being said, she has worked hard with a three year old colt and almost has him broke..... note I know nothing about a horse and she has done it all on her own..... great work Kaidynce!!

We also need to extend a big thank you to our second family, our hired crew, your time and effort doesn't go unnoticed and we couldn't do what we do without you!!

Here at Beechinor Bros Simmentals our goal is to produce a female that will be productive while maintaining a strong udder, correct structure and calm temperament. The heifers on offer are out of a full health program and were given Express FP 10 along with Covexin Plus prior to breeding. By sale day they will be fully covered with Scour Bos and will have had both rounds. This year we did this in the spring and the heifers should receive a booster once you have them home. The heifers came home off pasture in the middle of September and have been on a TMR. This year's group is a wide sampling of the many different herd bulls we make use of and of course the second offering of the Rumble females!! We are extremely impressed with how the group did last year and are thrilled at how Rumble stamps a perfect udder on his daughters!

Again, we would like to take a moment to Thank everyone on the Transcon Team. From the guys at the sale to the gals in the office we know that they are professionally looking after all the fine details and making sure I'm on track. We would also like to Thank everyone that supports our program and hope that your purchases do nothing but make you profitable.

If you have any inquiries about the offering, please don't hesitate to reach out to us or the Transcon Team. We would love to answer your questions and have a visit. To everyone that has inquired or purchased animals in the past we truly appreciate your support. If you are passing by the farm or near Didsbury prior to sale day, please stop in. If you are unable to see the animals in person there will be videos available on the Transcon website a couple weeks prior to the sale for your viewing pleasure.

Looking forward to seeing everyone,
John, Michelle, Kyler, Easton, Austin and Kaidynce Beechinor

I'm not sure how this female ended up with the sale heifers!!!! My mistake is your gain!! This long spined, easy doing, attractive female has always been an eye catcher. Whether it was as a calf, as a yearling or now as a bred she has always had "that look". 93H, Pol Erica's dam, is turning into a top end female. In 2023 she sold another good bred heifer to Flatlands Cattle Co. That same winter she had the very first rumble bull calf ever born, unfortunately she laid on it when he was only a few hours old. In 2024 she had this beautiful heifer and in 2025 she has a top end Malone son in the bull pen!! Bred for an early January Intrepid calf!!! Talk about the potential for a very marketable calf!!

I really shouldn't be selling this heifer!! This has been the only heifer I have gotten from 851F since her first calf 5 years ago! That heifer sold in the 2021 Western Harvest and has been working at Fly By Night Simmentals ever since. 440M is a big barrelled, easy muscling female who reminds me a lot of her dam. If you are wanting to sell big powerful bulls be sure to check this female out. She has been one of the big ones all of last summer and was on display with her dam at the World Simmental Congress just outside of Olds. I am excited to hear what she has for a calf as I have nothing but great reports about the intrepid calves.

Dark red, soft sided, yet still has that cowy look. This heifer is almost a carbon copy of her mother. Same square udder, same colour and same stylish look. I remember the day we couldn't decide between the two bred heifers that Wolfe's had on offer, so the decision was made to bring them both home. Both these Geronimo cows have turned into great cows and can be bred a number of different ways with excellent results. The Rumble females did a great job their first time out and we are very pleased with the quality of udders and the amount of milk they have in those udders. Bred to a bull we are really high on that sold in our sale this spring, Steady Eddy. Note his dam is our newest donor cow!!

Polled

A feminine, long spined heifer that has cow written all over her. There are a lot of characteristics I love about this heifer, but she is dropping an absolutely perfect udder!! Like the previous heifer this female is the result of flushing the great 48Z cow. Last spring 48Z was a major part of our bull sale. She had a son, a grand son and a great grand son in the group and her easy fleshing and heavy muscling was apparent in all of them. This heifer is a bit lighter coloured but that also comes from 48Z. When 425M lays down and has a calf it won't matter whether it is a bull or heifer it will be good as it will be A NAC Battle Cry! Tested Diluter Carrier

Today is your lucky day!!! Kyler has started College at Lakeland and tells me he needs the money. That's right if he wasn't going to school this heifer would have been staying home. This soft made, deep ribbed, easy fleshing bred heifer has a pedigree filled with maternal power. Kyler's original cow, 237Z, is Rubyette's great grand dam. 780E, her grand dam, is still at the farm producing high end animals year after year and 243K is showing she is going to follow in their footsteps! This shouldn't be a surprise with the likes of Climax, Viper and Impact all in the pedigree!

Both Heifers Dilutor Free.

Originally this was going to be a choice lot..... However, when Cowboss Simmentals and I bought the flush on the amazing Virginia Ms Zalenka cow I wouldn't have imagined that I would get 6 heifer calves..... also I should mention that their full sister, LFS Fancy 75E, is one of our donor cows. How greedy would I have been to keep one? Although these two are slightly different from one and other, I felt they both had lots to offer and if carry on the tradition they will be fantastic cows with tremendous feet, perfect udders and plenty of milk. Both heifers are tested dilutor free.

LFS FANCY 75E - Virginia Ms Zalenka daughter
Sold in the 2019 Western Harvest Sale

Well, I guess if you're going to offer up good ones then throwing a Suzie daughter into the mix would only be fitting. I remember telling Michelle that this heifer would be hiding at a different pasture so this wouldn't happen..... somehow, she found her way into the group destined for Western Harvest..... I don't want to say all the guess work is done but I don't know how else to put it. Dam = Suzie 46S, Maternal Sisters: BDB 1U, BEE 478B (BLL Creed's dam), plus two working for us and a full sister BEE 246K who is working at Lacombe's Farm in Ontario and was our high selling female in 2023. With a maternal background as deep as this I don't think there is much room for error!

Big, broody, deep, long, heavily pigmented, big feet, great udder development are all words that describe 434M. Oh and to boot she's polled!!! We are extremely happy with our Elevation females with many of them being top contributors in both the bull and heifer pens the last couple years. Fanikki's dam, 34H, was a top end polled bred heifer and we flushed her as a first calver. With the help of a couple recipis she ended up with three sons in our 2024 Bull Sale. This year she has put a strong Jackson son in the group for our 2026 Bull Sale. Note that 434M is carrying an exciting pregnancy to our new polled heifer bull Maverick which could result in a homo polled calf! Tested Dilutor Carrier

Another very good Elevation daughter that shouldn't be leaving. This bred heifer has been a standout since the very beginning. As a calf she spent the summer across the road and was on full display for everyone to see. Her dam was selected out of Oklahoma and is a total outcross to anything north of the 49th. This was her first kick at the can and we are totally impressed with what she has done. The breeding to NAC Battle Cry should lead to a very profitable calf!! I expect this female to be very productive and look forward to watching what she can do for you!

Another blood red almost black Elevation daughter! Like I said in an earlier comment we are very fond of our Elevation females with many of them being top contributors in our replacement bull and female pens over the last couple years. 460M's dam, 36B, was a big broody cow that caught the attention of many visitors over the years. We were very excited when she walked off the truck when the BMS cows arrived and she didn't let us down. I was offered money last fall for this heifer out of the pen and I said then that I couldn't sell her..... I'm not 100% sure how or why I am writing this comment but it will be very hard to watch this heifer walk around on sale day....

Welcome from Virginia Ranch

Virginia Ranch [Harry & Michelle; Brandon, Dani, Ryerson & Hayeson; Allison & Spencer] welcome you to the 2025 Edition of the Annual Western Harvest sale; the first inaugural sale in the New Sale Facility at Skywest Simmentals (Didsbury, AB). We are thrilled to still be a welcome participant at this sale in this exciting new venue. We once again are offering our entire 2024 fullblood heifer calf crop as bred females in this year's offering. Although the entity is shrinking; we are still proud of the gals we do have on offer. As Skywest Simmentals (the Edwards') purchased 100 of our cows they now have the largest offering in this sale - we are still gracious and thankful to the Edwards' investment in our life's work and hope they have no buyer's remorse! This past spring, we sadly lost Randy Ward; we were blessed to have had Rand-Mar (Randy & Marilyn) as an incredibly passionate business partner for over 13+ years (Randy truly loved Simmental Cattle). Our sincerest thanks to Rand-Mar and hugs/condolences to Marilyn. We always enjoy working with our fellow consignors Beechinor Bros. Simmentals [John & Michelle Beechinor], Langer Fleckvieh [Pam & Lyle Langer], Polar Farms [Joe & Lindsay Loomis] & Madge Simmentals [Tanner Madge]. We feel all of us collectively have offered a tremendous group of females that are full of potential for the Simmental Seedstock industry.

We invite you all to attend on sale day; however if you can't join us in person - please reach out to our trusted Transcon Livestock management team or join online through the online streaming service. If you have shown an interest in our consignments via phone calls, private farm tours or have taken time to view our consignment videos - we sincerely appreciate each of these gestures. We have been Simmental breeders for over 40 years and are proud of the animals we have raised that have gone on to produce for our fellow cattle enthusiasts. It warms our heart to look at many pedigrees and see the contribution Virginia animals have made on the Simmental business. We always strive to raise functional females with sound udders that are correctly built. We have a full herd health managed program. Before breeding these heifers received their modified-live vaccine of Bovishield Gold FP5, Covexin Plus. As newborns they received our new calf protocol treatments, then Bovishield Gold One Shot (twice/boosted). This fall they have received Ivomec pour on when they went through the chute during clipping. The heifers did not come off of pasture until September 20th- to be pictured for this catalog deadline date of Sept 25th; so the pictures you are viewing here are the heifers in their working clothes without any extra feed in them.

We have marketed our animals with the trusted team @ Transcon Livestock for our entire breeding career and have appreciated the professional service they provide to us. We are grateful to the Innisfail Auction Mart who up until this sale has always been a fantastic host facility - we want to give Danny Daines and his team sincere thanks for the many years! All heifers will have videos available to view a prior to sale day. They can be found on the Transcon Livestock website. If you should have any inquiries on our consignments we hope you will reach out to us, as always we will make the time prior to sale day for you to view personally any of our consignments.

Sincerely,

The Satchwell's

Beautiful, dark red, polled gorgeous heifer that traces back to a cornerstone female - Anchor "T" Barbi. Her dam, Destiny 23D has made many saleable offspring for us. Most notably was Virginia Jagr selling to John Beechinor (Beechinor Bros. Simmental) who purchased him to use as their heifer bull, till he unfortunately broke a leg while fighting with other bulls. Virginia Destiny 23D has great maternal qualities with an exceptional udder, and great feet under her at the age of nine. Maria is a real feature female and is ready to produce your high seller.

If you want a female that will produce, than look at this Virginia Marquee daughter. Her mother has had 10 calves in a row and has never missed; all of them selling through either the Bull sale or the Western Harvest sale – not too many cows can do that every year! Again this year she calved in January and had an outstanding heifer calf that you will see in next year's Western Harvest sale. Don't miss the opportunity to own Melanie 338M.

VIRGINIA RUSH 010K - Service Sire of Lots 51 - 57

Rush is a proven heifer bull that we sold to Perepelkin Farms at the 2023 Spectrum Bull sale. They bred commercial & fullblood heifers with him and had excellent results. Ashley kept sending pictures of Rush's calves to us and they all looked awesome. So needing a bull to comfortably breed 40 heifers too last year, we bought him back from them. Perepelkin Farms (Ashley) collected semen on him.

I can't see a weak pedigree area in this heifer. Megan is big bodied with extra power, is polled and is red right down to her dark hooves. She is the type of female that for sure will make ya some outstanding bulls. I have always said, "You want your cows to make saleable bull calves and the heifers will look after themselves." Well this heifer will do just that.

Lots of maternal strength in this gal's genetics. Her dam is a big broody cow that we bought in the 2017 Western Harvest sale from Starwest Simmentals for \$18,000. Her sire Sibelle Synergy now hangs his hat in Caldwell, Texas working for Ruby Lane Farm. This all-star bull really did make a huge impact on our herd. We were very lucky to own Synergy (thanks Philippe). I don't mean to brag, or maybe I do...but during the last two year's we have sold 13 Sibelle Synergy daughters that averaged \$24,000. Here is your chance to own a Synergy daughter as well.

Madeline is an impressive female, with extra growth, mass & correctness. Her mother was one of my picks at the Ricochet Dispersal sale. My loss after purchasing her was our daughters gain, as when I brought her home, our daughter Allison quickly cut a cheque for her...she has made a lot of money from this cow. Madeline's sire Skywest Kryptonite was the lead off bull for Skywest at the 2023 Spectrum Bull sale. There is lots of growth in his offspring. Madeline will hopefully acquire longevity from her dam who never missed and lasted 13 years! Although I did not observe a breeding on Madeline, in vet's opinion she was bred early in the exposure. If you are unhappy with her calving date we will happily buy her back.

Maggie reminds me a lot of the Century Hoover daughter that we sold to Abby Iverson of Olds, Alberta in last year's Harvest sale. Abby has nothing but good comments to report back to me on the pair (she got a beautiful heifer calf). Maggie's mother is a nice polled Synergy daughter who was supposed to be in the Western Harvest sale 2 years ago, but decided to lay down in the chute while I was clipping her and hurt herself, so I held her back from the sale.

Welcome from Polar Farms

We are once again extremely grateful and excited to be bringing 6 of our best bred heifers to the Western Harvest

This was a tough decision to let these ladies go, but it's not every day we get an opportunity like this to stand beside these other top breeders in our industry. So we thought this is the sale to show off what we have been building in our program.

Over the past few years we have been touring around and collecting ideas and genetics from around Canada to bring back to our northern BC ranch, doing this and along with the help and knowledge from some senior breeders we have started building a pretty impressive herd.

These 6 girls we brought to town are a quick snapshot of what we strive for in our program, they are thick, deep and full of body with great feet and disposition.

We are excited to see where these heifers will go and how they will perform in their next herd, feel free to reach out with any questions or stop by for a tour

Miley is the pen pet, quiet and soft disposition. We have a maternal sister working in our herd that was shown in the Dawson Creek simmental show as a bred heifer. Sired by SBV Landmark, who was the lead off bull sold at Mark Land & Cattle. His females are proving to be thick and broody cows in the making. Double goggled, dark red with lots of length and depth. Diluter free

Bred for early January to our new polled JNR Hefner 493M

Welcome to Transcon's 12th Annual Western Harvest Simmental female sale.

Different location and different scenery but what will be the same is the quality from each consigner. We do not expose our heifers to a bull and unfortunately, we had a little bad luck in our AI pen this year, so we will only be bringing four girls to town. They are very sound females out of quality cows and bred to proven and sought after calving ease sires. All heifers are on full herd health and will have their first scour guard shot before sale day.

Hope to see you all sale day.

Lyle & Pam

100% Full Fleckvieh. Homo Polled. Non-Dilutor
We don't often make homo polled heifers, but when we do.... Seriously Pol Madeline is an extremely powerful heifer out of one of our up and coming potential superstars around here. Julia hit it out of the park with this heifer and probably has the top prospect in the heifer pen this year as well. Pol Madeline is a very attractive female, nice feet, setting up a beautiful udder and has an outstanding disposition. We believe there is an enormous amount of potential in Pol Madeline to be a top contributor to your polled program. Bred up early to Anchor D Outlook. She will be well worth the investment.

Bred March 24 Anchor D Outlook no exposure

A great blend of out-cross genetics have come together to create this beautiful polled heifer. She has all the attributes required to be a dominant female in your herd, Dark red, big goggles, lots of body depth, plenty thick and out of a really well put together mama cow. Having Barbie up close on the top side never hurts neither. Bred to the highly marketable Anchor D Outlook. We think Polled Tattiana would be a good choice on sale day

Welcome from Madge Simmentals

Welcome to the Annual Western Harvest Female Sale.

What a beautiful fall we've had across the prairies this year. On behalf of Madge Simmentals, I'd like to extend a warm welcome to the Annual Western Harvest Female Sale.

First and foremost, a heartfelt thank you to Skywest Simmentals for hosting the sale at their outstanding new facility—it's a pleasure and an honor to work alongside you and the rest of our Western Harvest Fleckvieh family.

2025 has certainly been a year to remember, marked by another round of record-setting cattle prices. It's incredibly rewarding to see so many of our friends and family in the cattle industry being recognized and rewarded for the hard work and dedication they put in every single day.

This year's sale looks a little different for me, as I'm only offering one bred heifer and no calves. Going forward, I've decided to keep back the heifer calves and instead bring forward our very best bred heifers. With that in mind, we went right to the top of the pen to select this year's consignment, and we're excited to share her with you.

From all of us at Madge Simmentals, we wish you a safe and successful harvest season.

Bombshell is by far the standout of our 2025 bred heifer pen. This female checks all the boxes from hoof to head—an exceptionally large-ribbed, sound-footed heifer that's stamped with style and balance.

Her dam was a \$20,000 purchase from Blackgold Simmentals in their 2023 Evolution Female Sale, and she has lived up to every expectation. That young cow has already proven herself on her first two calves and in the flush pen, and 51M is a true reflection of her quality and future potential. The depth of rib, maternal presence, and correct build in this heifer make her a cornerstone female in the making.

She comes bred to BEE Leonardo 206M, the calving-ease herd sire we acquired from Beechiner Bros this spring. Whether your goal is to build a new heifer bull prospect or establish a rock-solid cow family, the resulting calf promises to be something special.

- Service Details:**
- Bred to BEE Leonardo 206M
 - Exposed: March 19 – May 15, 2025
 - Confirmed bred first cycle
 - Due: December 29, 2025 – January 19, 2026

We've all toured other people's cow herds and found ourselves stopped in our tracks by that one unforgettable female. That was exactly my experience the first time I laid eyes on Galicia nearly six years ago. A standout in the JB herd, she immediately struck me as one of the most complete cows I'd ever seen—powerful, deep-bodied, and structurally sound with undeniable presence.

I had always told JB when the time was right that I'd like to purchase Galicia, when that day came I didn't hesitate to agree to purchase her. Finding a cow of her age in such remarkable condition, with the depth, completeness, and maternal strength she possesses, made it clear she needed to come east. We knew from day one she had the makings of an elite donor—and she has exceeded every expectation.

Over the past year, we've flushed her multiple ways with outstanding success. Now, we're excited to share her influence and offer a few embryo packages. This is a rare opportunity to access the genetics of a proven female who checks every box and continues to impress with her production. Don't miss the chance to bring this kind of maternal power into your program.

Transcon Terms and Conditions

TERMS - The terms of the sale are cash, cheque, e-transfer, or wire and are due at the time of sale, unless other arrangements have been made between buyer and seller prior to the sale. Transcon reserves the right to charge interest at a rate of 2% per month on overdue accounts. The right of property shall not pass until after settlement is made. Transcon Livestock Corp. reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should any purchaser fail to settle for their purchase Transcon Livestock Corp. reserves full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. Transcon Livestock Corp and/or the Auctioneer shall have the right to refuse bids from anyone who has a previous record of default in payment or who has not made proper credit clearance prior to the sale with the owner or Sale Managers.

BID - No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted.

SALES TAXES - Applicable sales taxes will be charged on semen, embryos, and trucking fees (if listed), respective to the home province of the buyer, not the seller.

DISPUTES - In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

INSURANCE - Each animal becomes the risk of the purchaser at the time of sale and should be insured. Animals returning to the seller's farm must be insured.

US BUYERS - There is an additional charge (approximately \$300.00 US dollars) that will be applied to each animal purchased. This covers documentation, vet inspections/testing required to export. This cost does not include transportation or brokerage which is the responsibility of the buyer.

CATTLE PICTURES AND INFORMATION PROVIDED - The images in this catalogue are believed to be accurate representations of the individual animals and the information contained in this catalogue is provided by the seller and believed to be true and accurate. Transcon Livestock Corp. and catalogue designers/producers assume no responsibility if the images and/or information as received have been altered or is inaccurate.

CERTIFICATE OF REGISTRY - A registration/recording certificate issued by the applicable breed association and duly transferred will be furnished to the buyer of each animal after settlement has been made. It is the responsibility of the buyer to determine the acceptance of this certificate in any other association.

ANNOUNCEMENTS - All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

SHIPPING - Assistance will be given in making shipment after the sale but no risk is assumed by the Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

BREEDERS GUARANTEE - As per applicable Canadian Breed Association Breeding Guarantee guidelines. Copies are available at the sale settlement desk to be picked up by the buyer at any time. In no event shall the seller be responsible for reimbursing more than the purchase price. **EXCEPTION TO GUARANTEE** - In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

HEALTH - It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Transcon Livestock Corp. assumes no responsibility for the health status of any animal in the sale.

EMBRYO & SEMEN - Full settlement must be made before release is done and shipping arrangements should be done within 30 days of the sale unless arrangements made between buyer and seller prior to the sale. Shipping arrangements and costs are the expense of the purchaser once release has been given.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS AND OBLIGATIONS - The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

TRANSCON LIVESTOCK CORP. IS AGENT ONLY - It is to be clearly understood that Transcon Livestock Corp. is only acting as a medium between buyer and seller and is not in any way responsible for any failure on the part of either party to live up to his obligations. Neither does Transcon Livestock Corp. assume any financial obligations to collect or enforce collection of any monies between parties. Any legal action that may be taken, in exceptional cases, must be between buyer and seller.
