From the heart of hard grass country we are proud to offer 24 two year old purebred Charolais bulls. These bulls are produced to sire calves that will be born unsupervised on pasture and to perform to the maximum potential of the Charolais breed. Attention is paid to genetics and nutrition to enhance longevity and soundness. These bulls are all brothers to our bull battery that services a commercial herd of over 600 crossbred cows.

With great feet and long legs, 23M, 24M, 26M, sons from Duke 506E & ONL 31F are built for high miles and tough country. With a little more spirit than the rest, these aren't "load on a three wire fence across the road from the acreage with all the dogs" type of bulls. However, they would make great additions and blend in with a high performance battery of bulls.
