4 PM MST - SATURDAY, FEBRUARY 21, 2026

At the Farm - Willingdon, AB

# Welcome to our Annual Bull and Female Sale!

Welcome, and thank you for taking the time to look through our Bull & Female sale offering. Your interest and support truly mean a great deal to us, and we are excited to share this set of bulls with you.

At JNR Farms, everything we do starts with great cows. Maternal cow power and proven cow families are the backbone of our program, and they guide every decision we make. The bulls in this sale are backed by generations of productive, sound, fertile females that have consistently done their job. We believe great bulls are simply a reflection of great cows, and that belief has never wavered.

We remain fully committed to **100% Fleckvieh genetics**, focusing on cattle that are functional, efficient, and built to last. Productive cattle that work in real-world conditions have always been our focus, and these bulls are bred to sire females you want to keep and calves that perform from birth to market.

It's an exciting time to be in the cattle business. With record prices and strong optimism across the industry, we are confident in the future and in the value of investing in quality, maternal-focused genetics. The cattle industry is rewarding good cattle, and we believe this offering is well positioned to help our customers succeed.

We are proud of this set of bulls and grateful to everyone who supports JNR Farms. We look forward to visiting with you on sale day and throughout the year, welcoming both new and returning customers, and sharing our enthusiasm for the future.

We would like to point out that we do have a larger than normal percentage of SCURRED POLLED bulls in our offering this year. The scurred gene does not influence whether a calf is horned or polled; it only affects the presence of scurs in animals that are genetically polled. If the buyer would like the scurs removed, we will have our vet remove them at our cost.

Putting a sale like this together is never a one-person effort. We would like to sincerely thank our family, friends, and everyone who lends a hand throughout the year. From calving season to sale day, your help, dedication, and belief in what we do make this possible, and we are truly thankful for each of you.

We are always open to showing and talking cattle so feel free to contact us for a good visit about common interests in this Ag industry.

JNR Farms - The Repkas  
Jerry, Nicole, Regan & Rayanna Repka

## It's been a Milestone Year...

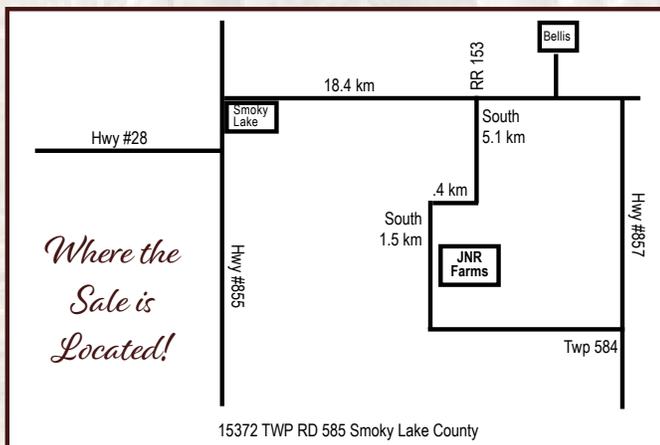

This past year marked an important milestone for our program with the opportunity to purchase and incorporate the Wolfes Fleckvieh mature cow herd. We are extremely grateful for the trust Shane, Shannon, Hanna, and Carmen Wolfe have placed in us, and we are truly honoured to carry forward a cow herd built on the same core values we believe in — strong maternal foundations, longevity, and consistency. These females add meaningful depth to our cow families and further strengthen the future of our program.

## A Bull for Everyone!

## The Transcon Team Welcomes You!

Welcome to JNR Farms annual Fleckvieh Simmental Bull and Female sale! This is a must-see set of bulls, so plan to come early for a look, then stay for the greatest prime rib meal you have ever enjoyed!

The Repka's are great hosts, whether it's a summer pasture tour (which is always impressive) or a winter bull pen tour. Their busy family operation will always make the time for a visit. I'm sure if you have been fortunate enough to stop by, you've enjoyed an amazing steak-I know I have! Jerry cooks up a great one! You will find the Repka's sale a truly special event to attend.

This year's bull pen is truly exceptional: dark red and soggy with many being polled! From high performance heavy muscled power bulls to calving ease specialists your search for a herdsire should start at JNR Farms.

I had the opportunity to tour the bull pen the first week of January, I was impressed. There is a great variety of types in the pen that will catch your eye for different reasons. There is absolutely something for everyone here, and I'm confident you will be impressed as well.

The passion and commitment Jerry, Nicole and Regan have for their 100% Fleck cowherd is unmatched. Their constant search for genetics led them to the purchase of the Wolfes Fleckvieh herd in 2025, adding 50 plus mother cows. I believe this step makes JNR the largest herd of 100% Fleckvieh Simmental cows in the nation.

As the herd has grown so has the ability to offer more females in the sale. This year's offering is larger and deep in quality, so definitely take a serious look. This is the only place you can purchase an open heifer and not take possession until she is bred! The Repka's will look after that part and send her your way after she is ultrasounded. That seems like buying a bred heifer to me -what great value!

Once again this year you get the opportunity to take a run at the Jamieson's set of commercial heifers. Tom and his family always bring a strong set of quiet, hairy, sound set of heifers that are highly sought after. With the cattle industry at lifetime high, it's a great time to step into replacement heifers like these.

Please join us February 21 at JNR Farms for an outstanding set of bulls and females, followed by some world-class hospitality! If you are unable to attend, please reach out to any of us on the Transcon team, we are always happy to assist. Remember, there is always great value in starting your herdbull search early!

For the Repka's,

Glenn Norton

## Additional Sale Information

### WHY WAIT UNTIL FALL TO BUY YOUR BRED HEIFERS?

Buy early and let us do the breeding for you. We will breed them here, then have them ready to go home at the beginning of June. Turn them out on pasture with your herd early, allow them time to adjust to your feed and management program, and set them up for a smoother transition and a better chance of long-term success.

- Insurance will be available sale day. If any animals are not insured the buyer assumes any and all risk.
- Weather permitting all bulls will be semen tested prior to sale day.
- No bulls will be loaded out sale day. All bulls will be delivered inter-province by JNR free of charge. Any bulls out of province will be delivered to central points across Canada with a \$500 credit towards trucking.
- Delivery of bulls will be approx April 1st, any bulls staying longer please make arrangements with us prior.
- The sale will be conducted under the standard Transcon Livestock Corp. Terms & Conditions. Copies will be available at the settlement desk.

- The Quantum calves have been some of the most anticipated of the year, and they have far exceeded our expectations—combining calving ease, muscle, growth, and eye appeal, all wrapped in an attractive, heavy-haired package
- Quantum, our 2024 sale high seller, was one we believed in strongly, purchasing a half interest back from JEM Simmentals to keep his influence moving forward in our program.
- On the maternal side, Mission's dam is a maternal sister to JNR Barbarian, a bull that continues to leave his mark across many different herds, adding another layer of proven maternal strength and consistency
- This calf has been a standout since birth, backed by a first-calving Proxy female that has drawn plenty of admiration already—a young cow with all the indicators of a very promising future ahead

### Polled, Dilutor Free

- This is a bull we seriously considered retaining for ourselves, the kind that checks so many boxes it's tough to put him in the sale
- He is moderate framed, very fluid in his movement, and exceptionally deep-bodied, with an extremely soft, easy-fleshing build that reflects the kind of cattle we strive to raise
- His dam is backed by some of the most productive cow families on the farm — extremely easy-keeping, with natural muscle and shape that is typical of the JNR Boulder cattle, adding another layer of proven maternal strength to this pedigree

- The **Franchesca** cow line continues to be one we eagerly hope for females from, as it has consistently proven itself as a foundation maternal line in our program
- The dam is a complete, functional cow with a beautiful udder, sound feet, and an excellent temperament. These are the kinds of females that quietly make a herd better
- This bull was born light at birth, yet carries performance with tremendous maternal strength, supported by a cow family that continues to rise to the top. **JNR Franchesca 241J's** first calf placed at the top of our 2024 replacement pen
- To round it out, this cow family consistently excels in production, ranking **Top 10 for butterfat** — another indicator of the maternal power behind this offering

### Homo Polled, Dilutor Free

- This **Homo Polled Quantum** son is sure to catch your eye, combining a smooth, clean build with plenty of style and natural shape — the kind of look that draws attention without sacrificing function
- The grand dam pictured is a **JNR Cashmere** daughter we purchased as a bred heifer from Lonestone Farms in 2021, a female that has quickly proven her worth. From that investment, we retained a son, **JNR Fuse**, whose first calves will be hitting the ground this year.
- **Matias'** dam was an early February-born female and, despite being one of the youngest in the replacement pen, was among the first to calve, offering an early glimpse of the fertility built into this pedigree

**Polled, Dilutor Free**

- This bull is built to be an extremely consistent producer, anchored by the **Graceful and Mystic cow families** on both the top and bottom of his pedigree — two lines known for reliability, productivity, and longevity in our program
- While his young dam's time was unfortunately cut short due to injury, the maternal strength behind him runs deep. He is backed by a 6- and 12-year-old grand dam, along with 12- and 14-year-old great-granddams that are still in production here today, a powerful testament to the durability and staying power of this cow family
- Phenotypically, he is well balanced, exceptionally thick, and carries plenty of hair, offering both the look and the substance to complement the maternal foundation behind him

- The maternal side of this pedigree traces back to genetics we imported from the USA
- The dam is a complete, well-made cow with a beautiful udder with strong fore-quarter attachment and she continues to prove herself reproductively, being one of the first to calve this year as a second-calf female
- From a phenotype standpoint, this bull brings extreme muscle expression carried deep and wide through his quarter, while maintaining balance and masculinity
- Maternally, Marque comes from a **100% horned pedigree**, making him a strong example of what can be achieved when homozygous polled genetics are crossed with powerful, proven horned cow families — combining maternal strength with modern convenience

- This cow family is known for carrying a larger frame with an extremely wide, powerful top
- We intentionally used Quantum on select cows in an effort to moderate birthweight while maintaining performance

- Marco is a maternal brother to the dam of Lot 49, tying him directly to another proven female with a bull in the offering
- Backing him is an 11-year-old dam that continues to impress with a beautiful udder and a strong, well-sized foot

- This bull combines several of our foundation cow families, including the Margo line — the cow family that helped lay the groundwork for **JNR Salton** and continues to influence the herd today

- With a 71 lb birthweight, he shapes up as a strong heifer-bull prospect, backed by multiple generations of calving ease on both the top and bottom sides of his pedigree — the kind of reliability commercial and purebred breeders value
- On the maternal side, his dam continues to stand out in production, ranking #6 for milk protein in our testing

- The dam brings valuable outcross genetics into the JNR program from the Dora Lee program, adding diversity while maintaining the maternal strength we prioritize
- Neptune shapes up as a strong calving-ease candidate without sacrificing growth or performance, offering the kind of balance that should work across a wide range

- Phenotypically, he is smooth made and stylish, born light at birth, yet still posted a solid actual weaning weight of 852 lbs, reinforcing his ability to combine calving ease with real-world performance

- The dam is an embryo female, and this is her first bull calf — a mating we believed in strongly, retaining both of her heifer calves to build on this cow family
- Based on the strength and consistency behind her, udder quality in his daughters should be outstanding, making him a bull that offers real value to programs focused on building replacements
- Phenotypically, he is loose made and moderate framed, with a square hip, and he is the kind that will produce excellent replacement females
- We've shown our confidence in this mating by breeding her back the same way, once again hoping for a heifer calf this year

- **BBBG Franchesca 301C** is now 11 years old and has earned her place in our donor program, a reflection of her consistency and long-term value. She has produced four females, all of which we have retained, including one that now stands as the dam of Lot #3—a testament to the depth of this cow family
- Her influence extends beyond our own program, with maternal brothers selling to Plain Lake Colony, Wilcil Cydejko, and Rock Solid Cattle, proving her ability to work across a variety of breeding programs
- In production, this cow family continues to excel, consistently testing in the **Top 10 for milk protein**
- Whether producing a bull or a heifer, her offspring have topped their contemporaries every year, despite being bred differently each time, highlighting both versatility and genetic strength

### Dilutor Free

- The dam is a moderate-framed, very easy-keeping cow, the kind that maintains condition and stays productive
- This calf shows lots of natural muscle expression, adding performance and shape
- He traces back to the Malita cow family, a line that has been very productive for us, with 16 females currently in the herd, offering both consistency and proven maternal strength

- These embryo sibs are maternal brothers to **JNR Barbarian**
- The Capri 1C cow was an extremely easy-keeping female with exceptional capacity and length of spine, traits that continue to surface in her progeny
- We are currently using a Haxan Reward herd son— **JNR Reward**, the sire of Lot 11–21 and 69–74, following our experience sharing **MFI Petra 19L** with Gibbons Farms, which reinforced the value of incorporating Haxan Reward genetics more heavily into our program
- Both bulls are bred with a strong maternal focus, positioned to sire high-quality replacement females while still offering impressive growth
- Lot #22, raised on a slightly better recip than his brother, ranked **3rd of 66** sale bulls for weaning weight and 2nd among all horned bulls
- Together, they offer a rare opportunity to add proven, old-school, outcross genetics with real performance to any herd

**Smooth Homo Polled, Dilutor Free**

- Out of a first-calf dam that ranked **#8** for milk protein
- This pedigree blends old-school influence through a direct C&B Western 2nd dam, while the **homo polled** gene comes from both the maternal grand dam

who is still in our donor program at 15 yrs old and the sire, **JNR Quest**, offering genetic consistency and longevity with the convenience of auto de-horning

**Smooth Homo Polled, Dilutor Free**

- JNR Margo 307K now a second calver, is extremely quiet and will lick you just as much as her calves given the opportunity
- Maternal grand dam JNR Margo 583C calving this year at 11 years old, has an outstanding record for polled performance:

- 2023 polled heifer calf (Manalo's dam) **#2** for weaning weight out of 87 heifers
- 2024 polled bull calf was **#2** for weaning weight out of 89 bull calves, sold to Tom & Terri Jamieson
- 2025 end of Feb born polled heifer **#2** for ADG out of 95 heifers she is in our replacement pen

**Dilutor Free**

- From one of my favourite cow families
- Dam JNR Sienna 177J is a leading contender at the top of the cow herd; ranked **#1 for milk protein**
- She calved with her 4th calf the first week of January and is so easy-keeping you wouldn't know she had just calved
- We typically don't picture cows until 4 years of age, as first- and second-calf females are balancing growth, maturing and production; however, when pictured as a second-calf female, she looked the part
- Maverick ranked **Top 10 in the bull pen for WWT**
- Last year's maternal brother sold to Jacob & Becky Boychuk
- This calf offers extra muscling, depth, and balance — a very complete bull

**Dilutor Free**

- A 3/4 brother to **JNR Stone** and an absolute **MEAT MACHINE** — power and performance stamped from the start
- Every female out of **Lolita 177Z** has been retained, a cow that continues to define consistency and value in our program through her progeny
- Nitin is an embryo calf, with more full siblings in the tank — this is a mating we are heavily invested in for the future
- This is the kind of bull programs are built around — backed by a sire with a proven track record and generations of reliable cow power
- Massive thickness, width, and hair, loaded with industry-preferred pigment and supported by proven cow families— a bull with limitless potential and true herd-sire presence

JNR'S CONCEPT

JNR SHAMU 616C

**Polled, Dilutor Free**

- With limited semen available on **MFI BamBam**, this represents a rare opportunity — his performance is proven through generations of progeny found throughout our pedigrees and across Canada and the USA

- Marko is a 3/4 brother to **JNR Boulder**, both direct **MFI BamBam** sons out of the highly maternal MFI Shamu cow line
- Calving ease influence from **JNR Titanium**, with the polled gene coming through **JNR Concept**

56

- Boy oh boy... this was not an easy decision — After a lot of debate — Nicole won this one
- Out of a first-calving female, this is the first homo polled female we have ever offered by public auction in 26 years and she really is a sweet heart of a heifer carrying adequate power in an extremely attractive package
- **HOMO Polled** and backed by an elite, time-tested pedigree on both the top and bottom
- From the very first calf crop of JNR Quantum, a sire who has blown past expectations with sons Lots 1–9 and the second-largest sire group in our replacement pen — this is the only JNR Quantum heifer we are (very reluctantly) letting go
- The JNR Flora 597C cow family is a cornerstone for us: 7 calves produced, only one bull who made the bull pen, with all six daughters retained; her influence continues with granddaughters in Lots 70 and 83
- Ranked #6 for WWT out of 20 sale heifers, backing her look with real performance

SOLWAY ADONIS  
MFL ELLEN 59E

- A distinctive pedigree offering something different on the paternal side, stacking **Haxan Reward, Caseys Majesty, and Solway Adonis** for added uniqueness
- From the powerful Ellen cow family, represented by 27 walking females in our herd and featured throughout the offering in Lots 10, 18, 20, 79, and 85
- Marisol led the offering at **#1 for weaning weight** and ranked **Top 6 for both ADG and WPDA**, combining performance with proven cow power

- Ophelia is a 4th-generation red, 100% Fleck female — and she is an absolute standout
- Backed by the legendary Sue and Graceful cow families, a pedigree you simply can't go wrong with
- Her dam ranked #3 for butterfat in the heifer offering
- This is the kind of female Fullblood or Purebred breeders can build a program around — depth, quality, and cow power from top to bottom

- A super quiet, pet-like female, Mariah was a 59 lb twin at birth, raised on one of our Brown Swiss cows and still had to compete with a bull calf for milk — her twin sister was retained in our replacement pen
- The only JNR Barbarian heifer in this year's sale
- Last year's maternal brother sold to Devon Blackhurst
- Both maternal great-grand dams remain in our herd at 14 years of age, reinforcing the longevity and durability behind her

**Smooth Polled**

- Regan's first-ever heifer consignment — and honestly, a female that probably should be staying here, but when everyone wants her, this might be the best way to solve a problem that isn't really a problem
- Sired by **JNR Steele**, out of a first-calf heifer Regan retained from the **BLL Sugar** cow family — the dam of Lot 62
- A very complete heifer: deep, uniform, feminine, hairy, and wrapped in a polled package — she is an absolute beauty

### Homo Polled

- Youngest heifer in the offering, from our cornerstone Ellen cow family and line-bred JNR Boulder
- Stacked with maternal strength—fertility, udder quality, consistency, and cow longevity proven generation after generation
- The kind of female you build cow herds around; we debated long and hard about selling
- A guaranteed polled calf every time

**Smooth Polled**

- Amelia is a very special female that Nicole would have preferred to keep, we did retain her Maternal sister last year
- A deep, broody heifer with impressive performance—out of a second-calf dam born late January, yet she topped the heifer offering ranking **#1 for ADG and WPDA**, delivering performance in a polled package
- Her dam ranked **#1 for butterfat** in the heifer offering, a trait the **127K cow family** consistently excels at year after year
- We love this heifer's capacity and big hip—built to make the kind of calves you want to build a cow herd around
- As with Lot 77, the combination of the **127K cow family and JNR Proxy** continues to work exceptionally well

- A 100% horned pedigreed female
- Dam ranked **#2 for milk protein**, with last year's heifer calf retained in our herd
- This mating represents a rare opportunity, as semen on **JNR Highlight** is extremely limited following his unfortunate loss to a broken hip in the bull pasture after his first breeding season
- Fortunately, we retained eight daughters last year, and true to the **Haxent line**, their udders are nothing short of phenomenal
- We have strong confidence in this mating—Nessa's grand dam was bred to **JNR Highlight** in his first year, resulting in a set of twin heifers that both remained in our herd

## Commercial Heifers consigned by Tom & Terri Jamieson & Family

Welcome to the Annual JNR Bull Sale. We would like to sincerely thank Jerry, Nicole, and family for welcoming us back for the sixth year. Once again, we are proud to offer a strong, consistent group of quiet red and black heifers, all sired by JNR bulls and developed with a focus on temperament and functionality.

This year's offering includes several JNR Kanon-sired heifers, adding extra size and depth along with strong maternal strength from the Bullet Proof cow family. All heifers are polled, enrolled in a complete herd health program, and have been palpated prior to sale day.

A big thank-you to our kids, who are out there every day working alongside us—without their help, this wouldn't be possible. We also extend our appreciation to all past buyers and bidders who have supported us by purchasing our females over the years. If you have any questions, please feel free to call **780-206-7557**.

MASON, IVY AND CLAIRE
