## WELCOME TO OUR 14TH ANNUAL BULL SALE

The year 2025 was an exciting year for the family!!! As the children get older change is eminent. Kyler graduated from High School and is taking Crop Tech (he says his dad can teach him about cows.....) at Lakeland College. He was worried about leaving us and not being around the farm to help. We told him he needed to go out and experience life and that we would be fine..... I didn't know he did so much..... But thrilled he is getting a post secondary education! Easton turned 16 and got his drivers licence. This new found freedom is exciting and having another driver isn't a bad thing either. The best part is Easton and Austin (Bob) made the same hockey team..... Guess who drives to practices.... Not Michelle!!! Kaidynce still has a love for horses and even spent the summer training a young colt to ride. This is crazy to me as there isn't anyone in this house that has any horse experience! I should add that all the children are a huge help around the farm and spend countless hours helping get the chores done! Thanks guys!!

For those that don't know our program, we strive and are proud to produce animals that go out and get the job done. We will calve close to 650 cows at the start of 2026. This includes the Purebred Simmentals, Purebred Charolais and the commercial cows. We often tell people that the bulls we offer are bulls we wouldn't hesitate to use in our commercial herd and as you go through the catalogue you will notice we have even collected semen (with the new owner's permission) on some of our favorites over the years. When selecting replacements and breeding we put a lot of emphasis on cow families, ease of calving, growth rates, temperament, udders and feet. A little side note, in the red section, 15% of the bulls stem from the Mitzie line. A member of this line, 62X, is currently being flushed as a 16 year old cow!

All the yearling bulls have been fed together since the very end of August. The bulls are eating a TMR diet that consists of corn and cereal silage, haylage, chopped hay and a starch free pellet. All the ingredients are tested and balanced to allow the animal to show their natural growing abilities and achieve a strong ADG without harming their long-term development. We do not push the feed to our animals and pride ourselves on the fact that many customers express how their bulls actually gain weight or maintain their condition throughout breeding season. The greatest compliment we hear year after year, is how our bulls work for an extended period of time with some reaching 9 and 10 years of age!

We are fortunate to still be farming with my parents, Barney and Melody and are excited to be in partnership with them on our new Charolais endeavor. Over the years Mom and Dad have been our major support system giving us years of knowledge and many hours of help. Along side the purebred cows Mom and Dad also run a large commercial herd. Although Mom and Dad own these cows, we feel fortunate to have them around as they help keep us focused on the overall end product that everyone is trying to achieve.

As always, we are excited to have Beechinor Land and Livestock, Stefon and Rebecca Beechinor joining us this year. Be sure to check their offerings out as there are several interesting and high quality individuals.

If you have a minute, I invite you to give me a call and help you find the bull that will suit your needs. We feel there are a variety of different bulls and are more than happy to help make sure you find the one you are looking for. We know that sale day is busy for you and that there can be schedule conflicts. If for some reason or another you are unable to join us sale day, we highly encourage you to come out to the farm and view the bull pens at your convenience. If you are unable to be present on sale day and are wanting to participate, we encourage you to phone us or take advantage of the trusted and professional staff of Transcon Livestock or Bohrsen Marketing.

We look forward to visiting,  
John, Michelle, Kyler, Easton, Austin and Kaidynce Beechinor

The Beechinor Family

# *Beechinor Bros.*

*Special Thanks to all  
of our Buyers and Bidders  
Throughout the Years!  
Your support is  
Greatly Appreciated!*

## Welcome from the Transcon Team.....

Welcome to the 2026 edition of the Beechinor Bros Bull Sale, alongside Beechinor Land & Livestock.

Monday, March 2nd will be a big day for the small town of Bentley as one of the area's largest agricultural events takes place—the annual Simmental and Charolais bull sale hosted by brothers John and Stefon Beechinor. The team at Transcon is pleased to formally invite you to the Beechinor Bros 14th Annual Bull Sale, held at the Beechinor sale facility near Bentley.

When thinking of the Beechinor family, two things immediately come to mind: family and cattle. Both Beechinor Bros and Beechinor Land & Livestock are truly family-driven operations, with multiple generations working side by side in the day-to-day management of the programs. These operations are built on a deep-rooted passion for the cattle industry and a strong understanding of what it takes to raise functional, profitable cattle.

They eat, sleep, and breathe cattle. Agriculture here is not simply a job—it is a livelihood. If you are looking to buy bulls from hardworking, honest, and knowledgeable cattlemen, you have come to the right place.

This program's success is driven by many factors. Beyond the bulls themselves—which perform regardless of budget level—the customer service is second to none. From taking the time to visit with each customer, to offering volume discounts on total purchases, and ensuring smooth and reliable bull delivery, the Beechinors are committed to providing a seamless and positive buying experience.

Buyers can be confident they are in good hands when sourcing their next herd sire from this program. The high number of repeat customers is a testament to the long-term success of the Beechinor operation and speaks volumes about the quality and consistency of the cattle on offer.

Bulls are rigorously screened for foot quality, structural correctness, and disposition, resulting in an impressively quiet and manageable set of bulls. As you evaluate this year's offering, you will find a strong lineup of proven sires that have stood the test of time, along with exciting new sire groups—including progeny from past high sellers of this very sale.

The continued investments made by both brothers clearly reflect their commitment to the commercial cattleman. This truly is a one-stop shop for bull buyers. Whether you are searching for Fullblood, Red, or Black Simmentals, or Charolais, you will find them here. These two breeds complement each other exceptionally well, and for producers utilizing both, bulls can be sourced in one location while taking advantage of the three-bull discount.

While this year's Simmental offering includes a larger-than-normal selection of calving ease bulls, there is no shortage of performance and power. Regardless of your program, colour preference, or production goals, there are bulls in this sale capable of taking your operation to the next level.

With near-record cattle prices, strong optimism for the future, and quality cattle being rewarded at the sale barn, it is an exciting time to be in the cattle industry. Do not miss this opportunity to invest in genetics that will enhance both the productivity and profitability of your herd.

I strongly encourage you to make the drive to the Beechinor Farm near Bentley on Monday, March 2nd. Come early, enjoy a great steak lunch, and take the time to tour the bulls—you will be glad you did.

If you are unable to attend in person, please feel free to contact any of us at Transcon. We are very familiar with the Beechinor program and this year's offering. Our cell phone numbers are listed below, so don't hesitate to call and take advantage of our conflict-free absentee bidding service, which is, of course, provided at no charge.

Beechinor bulls are built to work, backed by family, and proven where it matters most.

# Beechinor Bros.

## Welcome from Bohrson Marketing

Welcome to the Beechinor Bros and Guest Bull Sale. Many years ago, John and Stefon were given money to go and buy the best absolute bull they could find for their dad Barney. After a long tedious search, they bought a bull from Twin Chief. With encouragement from Barney to start a purebred herd of their own, they returned a year later and bought a heifer from the same people...the rest is, as they say, history. Fourteen years later and the Beechinor Bros sale is going stronger than ever.

Well, like the Beechinor Kids, the bull sale has grown too. While the sale has always included top notch Fullblood and Purebred cattle, Charolais were added not so many years ago. Man has that Charolais group ever found its stride at the Beechinors! Doesn't matter what breed you are looking at in this years offering, focus has been on phenotype, performance and real world reliability for real world applications. Genetics lead the way with many sire groups crossed with a hard-working cow herd. Interesting fact: the Beechinors have used 25 different sires in the Simmental group and 8 different sires in the Charolais group, yup, we are talking about genetic diversity for sure. I know some people may say that's too many and it's hard to see what one herd sire can do. To those people I'd say that the Beechinors calf out over 650 cows, they can experiment a bit to see what works. When I say hard working, they have a cow, Mitzi 62x that is 16 years old and is still in their flushing program. She still has great feet (that have never been touched) and a pretty darn good udder, that's longevity that we all could use! Note that 15% of the red offering goes back to this cow line.

There are many bulls in this sale that have a lot of calving ease. They have intentionally been trying to provide calving ease bulls along side the power bulls on offer. Some real curve benders that come small and crush the fall scales are available to you to improve your program. Be sure to check out actual real weights taken end of August. One bull weighed just short of 1100 lbs, see if you can find him.

Once again bulls from BLL, Stefon and Rebecca Beechinor also add to the quality of the sale. They Bring some extra age and yearling bulls that are always highly sought after and off a high producing cow herd.

Best Regards,

The Bohrson Marketing Team

Darryl Snider

Cody Haney

### SALE STAFF

Auctioneers.....Ward Cutler  
Ringmen.....Robert Lind, Mark Stock, Darren Paget

INSURANCE Kolton Kasur • Canadian Farm Insurance.....780-387-8376

### DELIVERY

All bulls that are remaining to be housed after the sale must be insured. Bulls will be housed free of charge until April 15, 2025. Animals will be delivered free of charge to points across Alberta, BC, Manitoba, and Saskatchewan. This will be done at the buyer's convenience, however, if the truck is in your area you may be asked to take your bull early. We will do our utmost to deliver your bull to your yard.

### SIGHT UNSEEN

If you are unable to attend the sale, but are interested in bulls, please feel free to give the consignors a call prior to sale day and they will personally go over the bulls and your program to recommend the animal that would meet your needs. Following that, the Transcon Livestock and Bohrson Marketing teams will represent your needs in a professional and confidential manner.

### HEALTH & FERTILITY

All bulls will be scrotal measured. All bulls over 12 months of age will be semen tested. All bulls were treated with Ivomec and such products and have received all their vaccinations. Contact seller for details on programs. All sale bulls have been given Fusogard vaccine for foot rot prior to the sale.

### VOLUME DISCOUNT

We would like to offer to our past, present and future customers, as a gesture of appreciation to anyone who purchases 3 or more BULLS, a discount of 5% off of their TOTAL INVOICE. Thank you for your support!

### EPD EXPLANATION EPDs are "Expected Progeny Differences".

They are a useful tool in selection. EPDs incorporate the individual animal with its ancestry performance. EPDs do not compare across cattle breeds. They are individual based per breed. EPDs indicate a probably variance above or below breed average for that trait for a given bull's progeny. The accuracy of EPDs for calendar year bull calves is generally about 20% (one out of five times) so use it cautiously as one of several selection tools.

Sire of Lots 1 - 3

Its pretty rare I get a random picture sent to me in September of a bull calf. Not only did this guy not own the bull calf but he literally had no strings attached. It was pretty obvious that this calf was full of meat and had exceptional depth. After getting his tattoo it was more intriguing to find out his was polled. Fast forward a few months and he is up for sale. Sadly, we weren't able to be the winning bidder but knew we would be watching him closely going forward. Not many days later a text came through that the new owners were going to be offering limited life time semen packages on the bull. Needless to say, we couldn't dial the phone fast enough to be sure we didn't miss a second time. With this being his first calf crop we are excited to report that he added muscle put on a polled head and both the bulls and heifers are amongst the top of their respective replacement pens!

Sire of Lots 4 - 12, 73 - 74

**RS**

I once had a wise man tell me that when you find the right bull with everything you are looking for there will be no limit on how much you can spend..... boy was he right.... Rumble is a bull that we knew had to find his way into our program the second we saw him. Of course, with a \$355,000 price tag, it added a bit of stress. Once those first calves started hitting the ground, we knew it was the right decision and there was some relief once we laid eyes on them. Now with two calf crops under his belt and his offspring pushing to the top of both the bull and replacement heifer pens we are thrilled we did what we did! At weaning time many of his sons broke the 900lbs mark. Its early to say but we believe that Rumble could very well have the biggest influence on our herd from this point forward. His sons are impressive to say the least and his daughters have that brood cow look. Over the last two calf crops we have crossed him with several different 'types' of cows and he has surprised us by how consistent he was able to make them. These consistent traits include deep swing ribs, hair, meat, red colouring, pigmentation and performance. Now to add to that list is his udder quality of his daughters. With the second set of daughters calving this January, we are thrilled to report the udder size, udder shape, teat placement and teat size are tremendous and almost identical on every female! Here is your chance to own a piece of a very bright future!

Sire of Lots 13 - 16

Sometimes a guy is in the right place at the right time..... To be totally honest I wasn't in need of a new herd sire but when the call came from Chad at Clearwater Simmentals to team up on Kegger it was a no brainer. Kegger was a bull that had definitely caught my eye and it was an easy decision. Now, almost two years later, you are seeing the results! I don't know about you but soft made, muscular, heavy haired, well tempered cattle are hard not to like. Kegger is a bull that has added all these features and to add to it he calves very well too!! Next test, what can the daughters do..... The replacement heifer pen says they are looking like they could become strong cows! Don't be shy... come on over and check out this Kegger!!

- A bull I have liked from the very beginning
- Huge wrap around goggles, double lipstick, dark hooves
- Long spined, great neck extension, great rib shape
- Hot Shot's dam, 82J, is a deep ribbed, dark red, fully pigmented cow with an absolute gorgeous udder who was the high selling female out of the Eastern Harvest Bred Heifer Sale
- 82J calved early again this year with a very good Rumble son.
- She did this even after being flushed last spring
- Also note she had one of our high selling bulls last year selling to Alpina Farms and we were fortunate enough to secure a little semen from him!
- At this point it is easy to say she will have a huge impact on our herd for years to come
- With Elevation being added expect this guy to bring in an amazing set of sons and daughters!

- These three bulls are full embryo brothers
- They are all similar but different
- Similar in that they are all dark red, double goggled, good haired, easy fleshing and come with calm temperament
- Slightly different in that they all have a bit different frame score 900M is the biggest, 075N in the middle and 175N is what I would call moderate framed
- Also note that 075N and 175N are the result of an embryo splitting and are therefore twins
- 75E, their dam, is a picture perfect cow with awesome feet and udder, dark red with large goggles
- 75E has a son and daughter working for Cow Boss Simmentals!
- We like 75E so much that we split 2 different flushes on her dam, 238Z, and had 6 full siblings and 5 half siblings on the ground in 2024 to 75E
- Their sire, Champs Romano, is a bull who is known across North America for his maternal greatness, ease of fleshing and extraordinary muscling.
- I really wanted these guys to be heifers..... my lose is your gain!!! Maternal greatness on both sides of the pedigree!!
- Whether your eye likes Iron Horse, Steel or Romano you won't be wrong!

ANCHOR "T" INGRID 99K

- Dark red, monster wrap around goggles making him appear like he is blaze faced
- Deep sided, moderate framed, nice square hip
- Premium's sire, Lenny, was Mark Land and Cattle's high selling bull in 2023
- 608D, Premium's dam, is a female that has stood the test of time
- She is a moderate framed female that has a perfect udder and does an amazing job bringing heavy calves in every fall with her only daughter producing in the herd as well
- Pirate marks her fifth of five sons to sell in our bull sales over the years and 608D just had her sixth bull calf here the other day, I just bet he makes it.....

- Smooth made, small skulled, moderate
- Double goggled, flat topped
- An interesting calving ease pedigree with Viper crossed with Titanium
- With a very limited semen inventory there will not be very many more opportunities to buy a son out of the renowned Viper!
- 226K, Timmy's dam, is a good uddered, dark red, big barreled female that is just starting her story
- Our top bred heifer from the class of 2022! She quickly entered the donor pen as a first calf heifer and we have a number of sons and daughters on the ground this winter, including her own natural calf
- Note that 226K is a 26U daughter making her a maternal sister to Rumble's dam
- Tested Dilutor Free

- It always amazes me how they can be so different but yet similar
- Both bulls are long spined, clean skulled, smooth shouldered with good strong feet
- Also one could say both bulls are blood red but 033N may have followed in his dams foot steps with the traditional colouring!
- 33J, Kubota and Leland's dam, is a power female who we purchased from Mackenzie Skeels
- We spent the first couple years building an embryo bank on her and now have her working her way back to becoming a normal cow
- 33J is a big framed, dark red, polled female that is an extremely easy doer

- Funny how every once and a while, as a purebred breeder, we get a reminder that genetics can do the unexpected
- This traditional colored bull was supposed to come with a nice blaze..... yet the sisters in the pen are solid red..... genetics...
- 31L, Freddy's dam, is so complete in every way. Capacity, length, colour, temperament, pedigree and structure!!

- Needless to say she had that 'look at me' thing going on and we were lucky enough to pair up with Agland Farms and brought her home from the Family Matters Sale.
- After being away flushing, we are excited to have her home again and see her first natural calf
- Its hard to believe that in a group of over 530 cows she somehow has the ability to stand out and catch your eye!
- Tested Homo Polled and Dilutor Free

- Big Bob is an interesting fella, who belongs to our outstanding hired man Dayton!
- Interesting in that he also carries the traditional coloring
- Interesting in that he is a bigger bull with EPD's in the top 10% for CE and top 4% for BW, altogether he is above average in 13/14 EPD categories
- 123L, Big Bob's dam, did an outstanding job on her first calf but this shouldn't be a surprise as she is a direct Viper daughter!!!
- Viper crossed with Red Wolf..... now that's interesting!!
- Note this guy started at a small 70lbs
- Tested Hetero Polled and Dilutor Free
- Co-owned with Dayton Klugkist

- Dark red, hairy, small nosed with good length of spine
- Moderate framed and catches your eye as you walk through the pen
- With his smooth skull and with his CE and BW EPD's in the top 15% this guy should calve well
- 77H, Woroschuk's dam, has an excellent udder. She may not be a big cow but she brings in a good calf every year
- One should know that 77H is also a very dark red, hairy cow with a blaze face and is backed by the good 338F cow we purchased from Skors
- Tested Hetero Polled

- Dark red, good hair, good temperament, nice top
- Good rib shape, good overall bull!
- Mr. Hercules, Cajun's sire, is a bull we found when delivering Mcruer's bull in 2021
- As soon as I walked into that bull pen he popped out and I knew he needed to be breeding cows at our place
- We are extremely excited to have his daughters calving as they have developed into outstanding females with exceptional udders and teat size!
- Cajun's dam, 81H, is a good milking, good framed cow who stems from the same cow family as Alpha
- Tested Homo Polled

- Big hipped, deep ribbed, wide topped
- Good hair coat with a sound foot
- Dam is none other than our famous 748E cow
- She could eat five-year-old straw and still be in top condition
- Continuously brings in a top end calf year after year raising some of our feature bulls for the last five years running
- She had one heifer calf that sold to Rainy Creek Farms, her last six have been bulls...
- These 6 bulls average 85lbs at birth (low of 81lbs high of 92lbs) and these six have weaned with an actual weaning weight average of 962lbs!!!
- Big John's actual weaning weight on August 29 - 1002lbs
- With not a single heifer calf being born out of this cow since I sold the first one, we decided to flush her and we are excited to finally say we have some daughters on the ground!
- Tested Homo Polled and Dilutor Free

- Another feature black bull from an outstanding cow family
- \*\*Please note Bolt is a bull who doesn't like being handled alone\*\*
- Deep swinging rib, hairy, good footed, full of meat
- A bull we loved from the day he was born
- His dam, 794E, has been bred this way four times in a row.
- Her first was our feature and high selling black bred heifer at the Western Harvest Sale, selling to Bar CL Farms, Her second works for Jeff Diegel, her third is Bolt and she had another son this January that looks awesome
- Here is your chance to step into a very strong cow family that has nearly 20 close connections to cows in our herd alone
- Also make note that our high selling red female in the 2023 Western Harvest came from this same cow family
- Actual weaning weight on August 29 - 1070lbs!!!!
- Homo Polled and Hetero Black

- If you like the Scorpion bulls look here
- No, he isn't a Scorpion son but he is the next best thing, his little brother!!!
- Captain Blaze is a bull we are very fond of, when we laid eyes on him year ago, not only did we buy a semen package, but we bought a son..... Red Wolf!!
- On the cow side he stems from the productive 759E cow who stems from the very productive 71Z cow, seeing a theme here.....? highly productive! Good answer!!
- 759E, Dark Knight's dam, is no one hit wonder! She is the dam of now five bulls to pass through the bull sale, one of those bulls, Scorpion, was a feature in our 2023 bull sale going to the good home at Nickel Farms, we were lucky enough to secure a semen pack and the calves are outstanding!! See the sons above and in the red section for proof!

Welcome to the 2026 addition of the bull sale. This year's offering marks one complete trip around the calf numbering alphabet for us with our first ever purebred calf born being an N back in 2003. We are grateful for the people we've met and the mentors we've made and the lessons we have learned. We hope we can make it another time or 2 around and continue to strengthen relationships and make new friends along the way.

Looking back to that first N calf we had born, I'm pretty pleased with the progress we have made. That first calf was an easy cull for multiple reasons so luckily the bar was set low. Jokes aside, ultimately the goal of our breeding program is continual improvement, just as I am sure it is for the majority of you reading this. Our offering this year is pretty diverse with options for many different facets of the industry.

We once again have a selection of fall born bulls. This is a deliberate program that was started years ago to spread out work load and give the option to buyers to get a bull with a bit more size and maturity if they so chose. These bulls are fed separately from the yearling bulls and can be brought along a bit slower. The yearling group is fed along side Beechinor Bros bulls on a balanced TMR ration. We do our best to manage our cowherd like our commercial customers manage their cows utilizing banked fall grazing, swath grazing and when the silage pile is opened we feed a ration formulated by a nutritionist to maximize use of low quality low cost ingredients like straw.

All bulls have been DNA tested for relevant information like homo polled, coat colour and dilutor status. New this year we have sire verified each bull and 100K SNP DNA tested to give an improved EPD accuracy.

We would like to thank John and Michelle for hosting us again this year as well as housing and managing the majority of our sale bulls over the winter. If you would like, we welcome you to come tour the bulls prior to the sale or contact us to discuss what your specific needs are and if we have a bull that would fit. If you can not attend the sale, feel free to reach out to the trusted and qualified members of the Transcon or Bohrson sales teams for their opinions and absentee bidding services. An exciting new feature this year is to have the sale broadcast online with bidding and viewing options through TEAM. We look forward to seeing you March 2nd.

NUG SUSIE 67Z

Captain Black is a smooth made bull that you'll appreciate even more in person with his impressive width and capacity. His grand dam 553C is one of a kind in our herd. She consistently weans off the #1 growth animals and Luster 268K was no exception. She was the shining star of her calf crop year, weaning off heavier than even the bulls that year. Captain Black's reasonable birthweight and high-ranking growth is consistent with this strong maternal line and his EPD metrics. 553C has produced numerous bulls for our sale including our high seller a couple years ago, Enterprise, to Red Willow/Diamond K and a ¼ brother of Captain Black as the sale heavyweight last year to our great customers the Marsh's at Southy. SKORS MS FORTUNE 141T

Disco is a powerful red bull that ranked 3rd in adj 205 day weight in our group. He is a balanced bull that shows depth, length and muscle which contribute to good actual and EPD growth numbers. His sire Sysco is a bull we added to our AI arsenal after seeing years of strong results from the Spring Lake and Crossroads programs. Disco's dam is truly impressive with lots of hair, body and a tidy udder. Maternal grand sire, Revolution, was a bull that was campaigned and won numerous banners and prizes but ultimately his legacy is in the production of his daughters. Maternal grand dam, Skor Red Fortune 176Y, could use up this entire footnote with her accolades. She is in the top 10 cows for registered descendants in the breed. 6 of these averaged \$21,800 in the 2025 Shades of Fall ranging from \$20000-\$25000.

Our fall calving program last year was heavy on heifers so this is the lone red factor, extra aged bull we have to offer. This big fellas dam was a high selling bred heifer through the renowned R Plus dispersal sale with her attractive build and outstanding pedigree. She has matured into a heavy muscled cow with a tidy tucked up udder. Monopoly's grand dam Tula is one of the premier donors in the breed. Monopoly's sire, Tycoon, is considered an older AI sire in the red purebred scene but his production ability is just as relevant in todays industry as it was when he first came into production. Some of our favourite young red factor cows are Tycoon daughters. Monopoly is a hairy, thick made bull with a big barrel and deep sidewalls. Owned with Red Top Livestock. Homo Polled, Non Dilutor

Force is the youngest of this management group but was one of the heaviest at weaning. His young dam is a moderate framed Sugar Ray daughter and having this big guy at her side was an impressive site. Seline 140J is on our radar as a potential donor as her first calf is the pick of this years first calvers and she followed it up with Force. Impact is a bull that we owe a lot of credit in building our cow herd through many ultra productive Eagle Ridge cows. Impact is typically more revered for his daughters, but this long, deep bodied,

good statured son with excellent muscle expression is arguably the best Impact son we have had in 20+ years. I expect this bull to be extremely versatile in producing top quality male and female progeny. Non Dilutor

Red Mountain has looks with his cherry red colour and with big wrap goggles. Genetically there is good calving ease on both sides of his pedigree but he hasn't given up much performance, especially for a heifers first calf with added frame and length. This guys dam, Kiki, set herself apart in the sale picture pen at Wolfes with her docile demeanor, large size and excellent foot. After calving she dropped a strong udder and she is quickly becoming one we are extremely excited about. Elevation is still breeding cows at 9 years old and

has been a very well accepted bull for almost a decade combining calving ease, eye appeal and dimension. Non Dilutor

Little Rock is an eye appealing bull with lots of hair and a long, smooth build. His dam Jaunita is a full sibling to the \$105000 Virginia Sawchuck bull that Beechinor Bros used. Much like his dam, Little Rock has lots of facial pigment. With just a 91 lb birthweight, he is the lowest of this nice group of Jackson sons. Juanita just calved today with a heavily pigmented Crimson Tide heifer that we already have high hopes for and the cow has a laid back attitude. Non Dilutor

Action is the result of combining proven and productive parentage with cattle of similar type and we expect his progeny to be the same. This moderate framed bull has lots of eye appeal, a big barrel, a wide top and carries a square quarter down low. Couture is dam of such bulls as Rumble, Crimson Tide and 3 feature bulls in this years offering. Jackson needs little introduction. Originally selling for \$155,000 and then selling walking rights at the World Congress sale for \$100,000, he is a profitable sire. This bull does tend to prefer a bit wider berth in the pen and while we haven't had any trouble handling him, he isn't one that comes for a scratch like some of his pen mates. Non Dilutor

Rebel Yell is the natural calf off Couture 663D, our favourite donor cow. There was lots of excitement around here the day this guy was born with a modest bw and loaded with pigmentation. The proven Nac Battle Cry continues to be popular with his unique ability to sire calves with added calving ease and economically useful traits. Couture's docile temperament came through strong in this guy and he was a favourite at flush facility where he spent many of his young months of life. At 10 years old Couture still has one of best udders on the farm. Couture has left a lasting legacy in our program and progeny like this help to increase that legacy across the industry. This bull is a very intriguing option with an eye appealing look, a small head, smooth shoulders. Non Dilutor

Livewire is a docile, dark red polled son of our top cow Couture. His flushmate sister was lead off heifer at last falls Shades of Fall selling for \$38000 to Jem and Beechinor Bros. Spitfire is a proven high performance sire that has produced many top sons for the industry over the years and numerous strong uddered productive daughters. Livewire is a long bodied, well muscled bull that had a herdbull look right from a calf and weaned off near 950 lbs in August with no creep feed. This is a bull that should add growth to a calf crop without sacrificing any maternal abilities. Couture again proves her versatility and merit with 3 feature sons from 3 different sires, all a little different but very useful in their own right. Non Dilutor

Blair has been one of our most consistent cows with a long list of accolades. Every calf has been either sold as breeding stock or retained and maybe even more impressive is that her 11 progeny have all been born in the first cycle. Now that is fertility. She has had sons work at Parview/Virginia Ranch, Sever Farms, DC Acres and Hollingsworths. A Sugar Ray daughter is one of our best young cows with a full sister at Faulkner Farms in Arkansas and other daughters at Starwest and Richlan Farms. Spark 525N was our thickest topped, widest butted calf all year and maintains that natural muscling ability. He is dark red and long bodied and should be one on your short list if you are looking for growthy steers and fertile, highly productive females. Electric Avenue is gone now due to a testicle injury but we will continue to see his influence through multiple sons we are incorporating as well as some great young daughters. Non Dilutor

This dark red bull is a pen leader in performance traits and is a bull with a big time look. Malta is a dark red, very long bodied, deep middled and wide quartered bull. He brings together a lot of traits that lead to power and performance, demonstrating this by being the top VVW bull this year at 992 lbs in August with no creep feed. He is fluid in his movement and stands on a big square foot. Malta's cherry red, big bodied, hairy dam is a cow we added to the donor lineup later in her life and she is still going at 16 years old. Malta comes from a very strong consistent flush with a couple full brothers being utilized in purebred herds including the high seller at Bull Rush last year for our partners in Blume, the Stout Brothers. Sire of Lots 111 - 116

As we travelled around looking at cattle we seemed to constantly run into a bull that added meat, depth and hair.... You guessed it! His name is Game Day. When the opportunity arose to buy semen on this great bull we couldn't resist. Fast forward to the summer of 2024 when we got to see Game Day in the flesh..... no joke he is full of flesh!!!! We are very happy with our results and have a great set of replacement heifers with several of them having Game Day on their tags as well.

- Three full brothers that are hard not to like
- All three bulls are deep ribbed, have good length of spine, have excellent hair and strong feet
- 3B was one of the first cows we saw the day we went to Wendall's.
- I remember having him stop the side by side so I could get out and take a picture of this magnificent female.
- Needless to say, when it came time to decide which cows we should use as a donor female she was one we wanted in there for sure.

- These two full brothers are performance at their best!
- Again Game Day sons full of extra red meat and extra hair!
- Sound footed, big sweeping rib and good length of spine
- 65G, their biological dam, is a big framed, hairy female with tremendous feet and huge barrel
- When we were selecting the cows to flush we asked Wendall for his opinion and he gave this cow very high regards
- We like the fact that the Clearcut 29U bull was right up there in the pedigree
- These females are all hairy cows with outstanding shape

- Good neck extension, clean skulled, superb muscle expression with a nice bubble butt, big barrelled
- Rogue's dam, 808C, is a cow we purchased from Thurston's.
- in our first visit it was very apparent that this cow had a strong impact on their herd as there were a number of very good daughters
- In our final visit/selection/preg testing day 808C came in open..... it was an easy decision that we would still bring her home and put her straight into the donor pen and boy was it the right decision!!
- Tested Hetero Polled

Sire of Lots 117 - 124

One of the biggest challenges we faced when you buy a large number of cows is bull power.... Its an even bigger challenge when you buy a large number of cows in a totally different breed..... With the help of our friends and sales management teams we put the word out to them to keep an eye out for good bull calves. After a bit of touring and looking all teams came back with the fact that the Tank sons were very impressive. All fingers pointed to one very interesting individual in particular and he went by the name Tremor! By chance I was driving right past Mcleod's on my way to the hockey rink and decided to pop in for a look myself. It was here I learnt that there was only going to be one semen pack sold in Alberta. After seeing him it was very obvious this guy had a place in our AI program and would help in the bull power department. Not only was he extremely growthy but he had an amazing EPD profile..... actually maybe the best I have ever seen with 11/15 being in the top 10% of the breed and 10/15 being in the top 3%. Now with the second set of calves on the ground another interesting fact has developed, many of his calves are born well under gestation with some being as early as 2 weeks! A definite positive is controlling BW and still maintaining the desired growth!

- A bull that has stood out from the start
- We have had a few bulls break the 1000lbs mark at weaning but this guy crushed it weighting 1094lbs!!!! YES almost 1100lbs!!!
- This shouldn't have been a surprise as he is incredibly long, great depth with a strong topline, good boned, strong footed and a big set of nuts
- One person maybe said it best..... "everything about that bull is big, except he still has a really nice shaped head"
- For some info on Megalodon's dam (and a picture), be sure to read the comments on the three maternal brothers at the start of the Charolais section!
- One should note that the Thurston's chose a full sister to this guy as the winner of our choice lot at the White Gold Sale
- Tested Hetero Polled

Like I said earlier the hardest part about buying a large group of cows is bull power! We were afraid that buying all yearlings to cover the cows would be a bit risky and decided to try to find a good two year old to help! After making a few steps we found Voyager and second bull named Apollo (a bull you will definitely see more of in the coming years). We went back and forth on the two bulls trying to decide which one we liked best and after many conversations and really not being able to come up with a firm decision we decided that if the price was right we would buy both! As it would have it, the price was right was right!!! Now with the second set of calves on the ground we didn't just find a good bull in Voyager, we found a great bull. His offspring are soft made, hairy and grow extremely well. Maybe the best part is that he calves incredibly easy but at the end of the day he brings in some of the most eye appealing replacements come weaning time.

Finding a herd bull can be hard, finding a herd bull in a breed you have only just began to understand and learn is really hard!! But one thing is common across any breed, a good bull is a good bull! After travelling a many of mile and stopping in at several different farms looking for a bull that could add a little grow but still maintain that soft made, easy doing look, we came across Legend. We travelled into Manitoba delivering bulls from our sale and on our way home we stopped at a number of different farms. After looking at what seemed like hundreds of bulls the one memory that sticks out the most is what my son Easton said after we got back in the truck after looking at Craig's bulls and cows. "Dad, that Lot 1 bull is A Hell of A Bull!" So, I grabbed the catalog and wrote just that across the top of his picture. Once we returned back home we started going through all the catalogs and noticed that we had started using Legend as the benchmark as to how the other bulls compared. Wait one minute I think we found the one!! He is..... A Hell of A Bull!

 SPARROWS KRYSTAL 116R

- Good topped, small nosed with a smooth skull
- A very sharp looking bull with a stylish presence to him
- Deep rib and flank
- 705E, Polar's dam, is a productive cow that left her stamp on the herd
- We have two direct daughters and grand daughter that all bring calves to the replacement pens
- Note that 3 out of the 4 cows in this cow family put bulls in this very sale!
- Tested Hetero Polled

- Meet Pumbaa, everything about Pumbaa makes sense
- Easy doing, huge barrelled, bubble butted, he even has a shorter ear
- Don't be mistaken, he is not a pig! He is definitely all bull!
- Note that for this guys overall mass he still has a CE in the top 15% and a BW in the top 10%
- 127L, his dam, was a first calf heifer and we couldn't have asked her for anything more
- Her dam, 127J, also has a son in this year's sale
- Tested Homo Polled

## Terms & Conditions

**TERMS** - The terms of the sale are cash, cheque, e-transfer, or wire and are due at the time of sale, unless other arrangements have been made between buyer and seller prior to the sale. Transcon reserves the right to charge interest at a rate of 2% per month on overdue accounts. The right of property shall not pass until after settlement is made. Transcon Livestock Corp. reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should any purchaser fail to settle for their purchase Transcon Livestock Corp. reserves full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. Transcon Livestock Corp and/or the Auctioneer shall have the right to refuse bids from anyone who has a previous record of default in payment or who has not made proper credit clearance prior to the sale with the owner or Sale Managers.

**BID** - No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted.

**SALES TAXES** – Applicable sales taxes will be charged on semen, embryos, and trucking fees (if listed), respective to the home province of the buyer, not the seller.

**DISPUTES** - In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

**PURCHASER'S RISK** - Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

**INSURANCE** – Each animal becomes the risk of the purchaser at the time of sale and should be insured. Animals returning to the seller's farm must be insured.

**US BUYERS** – There is an additional charge (approximately \$300.00 US dollars) that will be applied to each animal purchased. This covers documentation, vet inspections/testing required to export. This cost does not include transportation or brokerage which is the responsibility of the buyer.

**CATTLE PICTURES AND INFORMATION PROVIDED** - The images in this catalogue are believed to be accurate representations of the individual animals and the information contained in this catalogue is provided by the seller and believed to be true and accurate. Transcon Livestock Corp. and catalogue designers/producers assume no responsibility if the images and/or information as received have been altered or is inaccurate.

**ANNOUNCEMENTS** – All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

**CERTIFICATE OF REGISTRY** - A registration/recordation certificate issued by the applicable breed association and duly transferred will be furnished to the buyer of each animal after settlement has been made. It is the responsibility of the buyer to determine the acceptance of this certificate in any other association.

**SHIPPING** - Assistance will be given in making shipment after the sale but no risk is assumed by the Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

**BREEDERS GUARANTEE** - As per applicable Canadian Breed Association Breeding Guarantee guidelines. Copies are available at the sale settlement desk to be picked up by the buyer at any time. In no event shall the seller be responsible for reimbursing more than the purchase price. **EXCEPTION TO**

**GUARANTEE** - In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

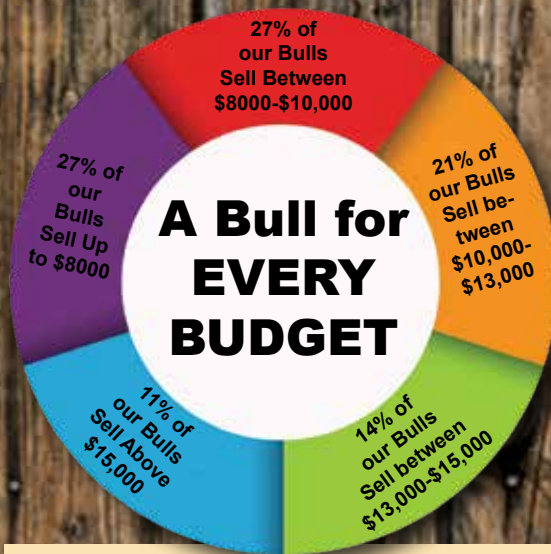

**HEALTH** - It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Transcon Livestock Corp. assumes no responsibility for the health status of any animal in the sale.

**EMBRYO & SEMEN** – Full settlement must be made before release is done and shipping arrangements should be done within 30 days of the sale unless arrangements made between buyer and seller prior to the sale. Shipping arrangements and costs are the expense of the purchaser once release has been given.

**ACCIDENTS** - Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

**RIGHTS AND OBLIGATIONS** - The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

**TRANSCON LIVESTOCK CORP. IS AGENT ONLY** - It is to be clearly understood that Transcon Livestock Corp. is only acting as a medium between buyer and seller and is not in any way responsible for any failure on the part of either party to live up to his obligations. Neither does Transcon Livestock Corp. assume any financial obligations to collect or enforce collection of any monies between parties. Any legal action that may be taken, in exceptional cases, must be between buyer and seller.

54% of our bulls  
sell between \$5-10,000

21% of our bulls sell
