Product Safety Recall

SAAB TAKATA AIRBAGS HAH AREA

GM Program #: 15043

Status: Complete

NHTSA: 16V063

Date Issued: 2016-05-11

Description

In some vehicles, the driver airbag inflator may experience an alteration over time, which could lead to overaggressive combustion in the event of an air bag deployment. This condition could create excessive internal pressure when the air bag is deployed, which could result in the body of the inflator rupturing upon deployment.

Safety Risk Description

In the event of an inflator rupture, metal fragments could pass through the air bag cushion material, which may result in injury or death to vehicle occupants.

Repair Description

Dealers will replace the driver airbag assembly on Saab 9-3 and 9-5 vehicles subject to this recall, free of charge.

Product Safety Recall**RECALL 15027 - DRIVER SIDE FRONT SEAT BELT CV**

GM Program #: 15027

Status: Complete

NHTSA: 14V318

Date Issued: 2014-06-11

Description

General Motors has decided that a defect which relates to motor vehicle safety exists in 2004-2011 model year Saab 9-3 Convertible vehicles. The automatic tensioning system cable in the driver's side front seat belt retractors may break, causing seat belt webbing spooled out by the user to not retract. If this occurs, it will become obvious to the seat occupant immediately.

Safety Risk Description

If a crash were to occur with a seat belt in this condition, the result could increase the injury to the driver.

Repair Description

Dealers are to replace the driver side retractor free of charge.
