Open Recalls

Recall #: N040007 | TAILGATE SUPPORT CABLE Recall Date: 2004 Sep 17

Recall Description

On certain pickup trucks and sport utility vehicles, the galvanized steel tailgate support cables that retain the tailgate in the full open (horizontal)

position may corrode, weaken, and eventually fracture. If both cables fractured, the tailgate would suddenly drop and strike the top surface of the rear bumper.

Remedy

Dealers will replace the cables free of charge.

Recall #: N010021 | CERTIFICATION & TIRE PRESSURE LABEL INFORMATION INCORRECT Recall Date: 2001 May 24

Recall Description

Certain 2-wheel drive pickup trucks fail to comply with requirements of FMVSS No. 120, "Tire Selection and Rims For Motor Vehicles Other Than Passenger Cars." The problem was caused by a computer error that resulted in the certification label listing tire size and inflation pressure information that differ from the tire size and the inflation pressure information for the tires on the vehicle. If the vehicle owner or someone servicing the vehicle inflates the tires according to the pressure specified on the label versus the appropriate pressure for the tires, the tires could be under-inflated or over-inflated depending on the tires mounted on the vehicle.

Remedy

Owners will be provided with a new label and installation instructions. However, a dealer can install the label if the owner so desires free of charge.
